504-665-015  
Gdańsk, Poland

## Languages

English C1  
Polish Native

## Objective

I am a data science enthusiast currently looking for a job suitable for a beginner in this field. My abilities allow me to do basic data analysis with the use of the technologies listed in the *skills* section. Connection of philosophy and data analysis is possible, I am currently working on a research paper on Bayesian inference within my master thesis in philosophy. I am eager to gain experience and learn new things!

I am interested in a full-time job, part-time, and also in an internship.

## Education

- University of Gdańsk 2018-2021  
Philosophy, Bachelor's degree
- WSB Gdańsk 2021-2022  
Data Science, Postgraduate studies
- University of Gdańsk 2021-  
Philosophy, Master's degree

## Skills

- R/Python - data wrangling, visualizations
- SQL - writing queries, functions, procedures
- Statistics and basic ML models
- MS Excel
- Reproducible research - R markdown, Shiny
- NoSQL databases - the basics
- Organizational skills
- Critical thinking
- Adaptability
- Communication skills

## Sample Projects

[Cohabitation and Divorce](#) - testing the hypothesis that cohabitation increases the probability of divorce (R)

[Diabetes Predictor](#) - developing ML model that can predict having diabetes and deploying it as a web app. (Python)
