Objective

I am a data science enthusiast currently looking for a job suitable for a beginner in this field. My abilities allow me to do basic data analysis, I am still learning new things, like building more advanced ML models. I am currently working on a research paper on Bayesian inference within my master thesis in philosophy. I am eager to gain experience in the field of data analysis.

I am interested in a full-time job, part-time, and also an internship.

Education

- University of Gdańsk 2018-2021
Philosophy, Bachelor's degree
- WSB Gdańsk 2021-2022
Data Science, Postgraduate studies
- University of Gdańsk 2021-
Philosophy, Master's degree

Skills

- | | |
|---|-------------------------|
| • R/Python - Data wrangling, visualizations | • Critical thinking |
| • SQL - basic operations, functions, Python integration | • Organizational skills |
| • Statistics and basic models | • Adaptability |
| • Reproducible research - R markdown, Shiny | • Communication skills |
| • Basics of Bayesian statistics | |

Sample Project

[Cohabitation and Divorce](#) - testing the hypothesis that cohabitation increases the probability of divorce
